使用注意事项:

1. 应将本机置于通风良好处;因本机是大功率放大器,内部发热严重,为保证本机安全可靠地工作,需要良好的散热条件。请不要将本机置于狭小密闭之处,在本机之上也不要堆放物件,保证本机散热孔的通畅。如本机散热不良,轻则影响机器的寿命,重则直接烧毁机器。
2. 请勿长期让本机工作于过载状态:不要将音量开得过大,使本机长期工作于削波失真的过载状态,如功放保护电路动作,请检查是否机器过热,如过热待冷却后再开机。
3. 本机与音箱的匹配:本机的音箱匹配能力相当强,几乎能与95%以上的家用音箱配接,但也应注意选配音箱的一些问题:
* 音箱阻抗不宜过低,最好不要低于4欧,本机在音箱阻抗为4~8欧时表现最佳。
4. 本机的VFD显示屏亮度可以分为十级可选, DIM OFF——DIM 10亮度是从弱到强,可以在面板“DIM”选择功能菜单或者在遥控器上的“DIM”按键选择你喜欢的亮度。
5. 与本机相连的连接线一定要可靠而准确,请不要将正负极性以及左右声道接反。
6. 将本机的“PRE OUT”到“AMP IN”的短路环去掉后,可单独从“AMP IN”输入信号。此时本机将作为纯后级使用,本机的信号输入及音量调节都不起作用,而应用前级的音量旋钮控制音量。(注意,在将本机作为纯后级使用时,请注意音源,前级,功放的开关机顺序。开机时先开音源,然后前级的电源,再开本机的电源。关机时应先关本机的电源,然后再关音源,最后前级的电源。否则可能冲击声导致扬声器的损坏)。

6 You can input signals separately from the "AMP IN" after detaching the short circuit ring from the "PRE OUT" to the "AMP IN". At that time, this machine will be used as a dependant post-amp, when the input signals and the volume adjustment won't work and you need to use the volume knob of the pre-amp to control the volume.

(Please note that when the machine is used as a post-amp, pay attention to the order of the start and stop of the audio source, the pre-amp and the power amplifier. Start the audio source, the power supply of the pre-amp, and then the power supply of this machine one after another when starting. Turn off the power supply of this machine, the audio source, and then the power supply of the pre-amp one after another when switching off. If you don't follow this, the loud popping sound may damage the speakers.)

Precautions

- 1 Place this machine in well ventilated areas because this machine is a high power amplifier which will generating heat inside. So good environment for heat release is required to ensure safe performance. Don't place this machine in narrow and airtight areas and don't put objects on the top of this machine to keep the venting hole unobstructed. If the machine can't release heat well, the service life may be affected, or even the machine will burn down.
- 2 Don't make the machine under the overload condition for a long time: don't set the volume too high or make this machine under the overload condition of peak distortion such as the circuit protection condition. Please check the machine if it is too hot, and if it is too hot, start the machine after it cools down.
- 3 Match of this machine and the speaker: This machine has good capacity to match with speakers, and can match more than 95% home speakers. But there is still something you need to pay attention to when you select speakers:
* Too low impedance of the speaker is not suitable for this machine, and you'd better not choose the impedance of less than 4Ω. The machine performs best when the impedance is 4~8Ω.
- 4 There are 10 levels of luminance you can select, from DIMOFF to DIM10. You can select the luminance level you like by pressing the "◀/||" button on the front panel to select SETDIM or the DIM button on the remote control.
- 5 The connection line connected to the machine must be reliable and accurate, and please don't mix up the positive & negative terminals or the left & right channels.
